

MILESTONE MARKETING GIVES YOU THE BEST RESULTS!

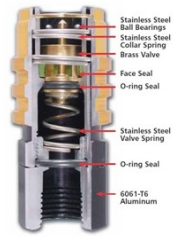

MILESTONE MAG DECEMBER 2011

“Keeping you connected.”

Jiffy-tite's revolutionary Quick Connect Fluid Fittings provide unsurpassed performance under extreme racing conditions. Made of lightweight, 6061-T6 aluminum, brass valves, and stainless steel ball bearings, they are corrosion resistant for extra long life. Jiffy-tite is the only quick-connect fitting on the market today approved for use in all categories of NHRA and IHRA. They are also accepted for use in the SCCA. There is a Jiffy-tite quick-

provide enhanced coolant and lubricant flow. They're simpler to manufacture, they install and uninstall faster, and they're lower cost. Jiffy-tite is steadfastly dedicated to improving our customers' bottom line with better ideas, better performance, and better value.”

connect fluid fitting available for all water, engine oil, transmission fluid and most fuel applications. They are

used by Pro Stock Champion Warren Johnson (far left at NHRA 2011) as well as the Frank Hawley Drag Racing School.

But Jiffy-tite is much more than components the company says: “We’ve spent decades working closely with our customers. With each new customer application, we’ve developed unique and creative solutions to address their problems. They’re lighter. They

MILESTONES IN RACING

It has been calculated that Santa moving from east to west around the globe, could use the different time zones and the rotation of the Earth to extend his night for as long as 31 hours. Since he needs to visit approximately 92 million households (the number of Christian children divided by the average number of children per household.)

He needs to travel approximately 75.5 million miles. Experts state that the distance divided by the time means Santa's sleigh must move at a speed of 650 miles per second, 3000 times faster than the speed of sound, to complete its route. Beat that Milestone in Racing!

Santa goes 3000 times faster than sound at 650 miles per second

Just dial Diamond; D-I-A-M-O-N-D...

Detroit, Michigan – If you lived in Detroit during the '80s and watched any TV at all, I'm sure you recall being pelted with commercials from the 'Diamond Factory', who's catch phrase at the end of their commercial was, "...just dial diamond; D-I-A-M-O-N-D..." The phrase was so catchy that not even a super lean nitrous tune up could burn it from your memory.

The diamond factory we're more interested in is the one at the end of Automation Dr. in Clinton Twp. - where we get our nearly bomb-proof aluminum racing pistons!

NEW Fluidampr Catalog Released

Released at the 2011 SEMA
Show, the all-new Fluidampr cata-
log features the most popular
damper applications, technical in-
sights and company history.

Highlights include the
Fluidampr performance damper for
Chevy Camaro LS3 and L99
engines, plus a full-line of Perform-
ance Diesel dampers for competi-
tion and serious work trucks.

You might be a racer if:

- You bought a race car before buying a house.
- You bought a race car before buying furniture for the new house.
- You're looking for a tow vehicle and still haven't bought furniture!
- You think the last line of the Star Spangled banner is: "Racers start your engines!"

- When something falls off of your car, you wonder how much weight you just saved.
- You've tried to convince your wife you needed that flow bench to fix the air filter on her station wagon.
- You wash your car like it was your firstborn child, you tend to its needs like it was your own body, you protect it like it's your family, then you drive it like you stole it.
