The Engine Parts Specialists

Automotive (Domestic-Import-Performance-O.E.M.) Heavy Duty (Gas - Diesel) Marine

Minneapolis, MN Green Bay, WI Kansas City, MO Indianapolis, IN

JPW is your one stop shop for engine parts and here's why: They specialize in engine kits, rotating assemblies, heavy duty inframe and tractor kits, replacement engine parts and shop supplies. With over a million dollars in engine parts on the shelf, they are able to respond to the needs of their customers quickly.

They are leaders in the automotive aftermarket and are committed to providing high quality parts at reasonable prices. As a wholesale supplier of engine parts they carry all makes and models of domestic, import, diesel, performance, heavy duty and marine applications. They specialize in engine kit and rotating assemblies, inframe and tractor kits, replacement engine parts and shop supplies.

JPW carries the manufacturers you need and are committed to providing high quality parts at reasonable prices.

- 4 locations for shipping points
- Multi-million dollar inventory
- Professional, experienced customer service
- 1-2 day service for most US locations with same day shipping

MILESTONES IN RACING

The Aztecs allegedly knew ways to manipulate natural rubber into useful items more than 3000 years ago, But the tire clock started ticking in 1839 when Charles Goodyear discovered vulcanization... by accident. Building on that Scottish inventor Robert Thompson patented what he called the Aerial Wheel (pneumatic tire) in 1845.

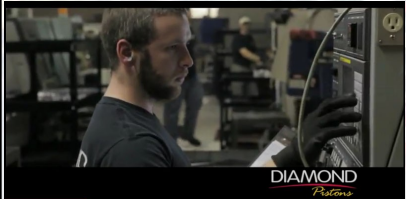

Since Thompson was so far ahead of the transportation curve, another Scot, John Dunlop, had to reinvent the air-filled tire in 1888 for bicycle use. André and Edouard Michelin shrewdly applied what they'd learned from cycle-tire manufacturing to cars in 1895. Their descendants patented the first radial tire - called Michelin X - in 1946.

Milestone Marketing stopped to visit their friends at KC Engines Automotive and Chassis—Dyno Testing in Kansas City, Kansas

Martin Wells Industries is an eighty-two year old engine parts manufacturing company supplying the Original Equipment Market and the Replacement Market worldwide. Their valve inserts and Valves have set the standard for performance and reliability in the engine parts industry for many years. Martin Wells Industries was founded by a welder who dedicated the company to the production-

tion and development of better products for the welder, the welding industry and later, the engine parts industry.

The advanced design, precision manufacturing, uncompromising quality and reliability of Martin Wells Engine Parts and Electrode Holders have enabled us to become one of the leading suppliers of both the military and commercial markets in the United States and throughout the world.

Drag Net—A man was speeding down the highway, feeling secure in a group of cars all traveling at the same speed; however, as they passed a speed trap, he got nailed with an infrared speed detector and was pulled over.

The officer handed him the citation, received his signature and was about to walk away when the man asked, "Officer, I know I was speeding, but I don't think it's fair – there were plenty of other cars around me who were going just as fast, so why did I get the ticket?"

"Ever go fishing?" the policeman asked.

"Uhhh, yeah..." the startled man replied.

The officer grinned and asked "Ever catch ALL the fish?"

How to Identify Where a Driver is From

One hand on wheel, one hand on horn: Chicago

One hand on wheel, one finger out window: New York

One hand on wheel, one hand on newspaper, foot solidly on accelerator: Boston

One hand on wheel, cradling cell phone, brick on accelerator: California. With gun in lap: L.A.

One hand on latte, one knee on wheel, cradling cell phone, foot on the brake, mind on game: Seattle
